ADHESIVE THERMAL PROTECTOR  
TEFIBRAL 490 HT (0,80 mm) - TEFIBRAL 1000 HT (1,60 mm)

#### DESCRIPTION:

Thermal protector made of fibre glass tissue resistant to very high temperatures. It incorporates a thin refractile aluminium foil on one side and a technical adhesive with high performance adhesion on the other side.

High mechanical strength and adaptability to all surfaces.

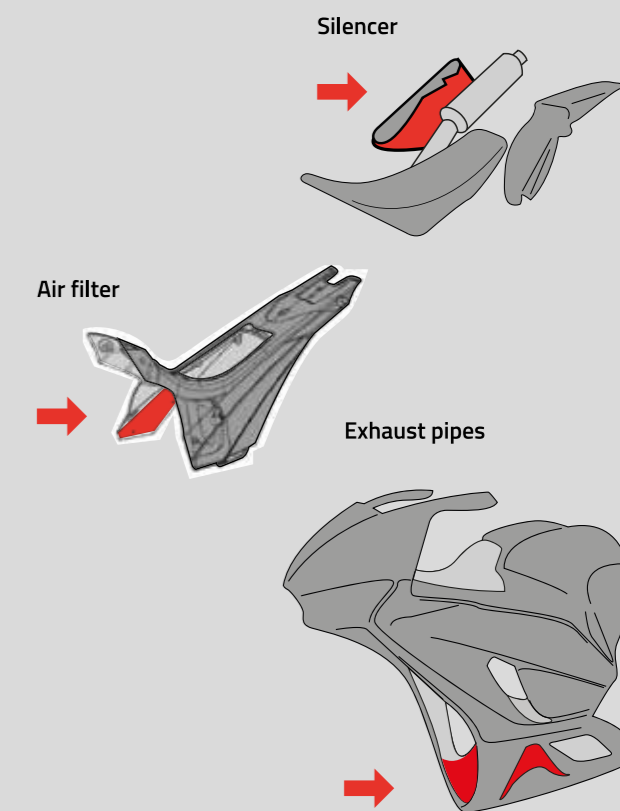

#### HOW TO USE IT:

1. Draw the desired contour with a permanent marker and cut it with scissors.
2. Clean and dry deeply the surface to apply the Tefibral part.
3. Stick the Tefibral part into the surface to be protected.

**WARNING:** The adhesive must be placed on the surface to be protected, NEVER on the body originating heat (engine, exhaust...).

#### APPLICATION EXAMPLES IN A MOTORCYCLE

**OTHER APPLICATIONS:**  
Protection of tank, battery, electronic devices...

## WE TAKE CARE OF YOUR ENGINE

ALL MATERIALS HAVE BEEN ACCURATELY SELECTED TO PROVIDE THE BEST PERFORMANCE EVER SEEN.

Our new yellow top-grade material, ARTEIN CS6900 SOFT, provides an unprecedented combination of high compressibility, recovery and temperature resistance for engine areas with a low tightening torque.

FOAMET® gaskets (Aluminium core with two sides of Elastomer Foam coating) are also chosen for a low tightening sealing and a perfect adaptability.

For the cylinder heads, embossed multilayer steel (MLS) gaskets and single layer metal gaskets with elastomer coating are individually inspected to assure an optimal sealing under high mechanical and thermal stress.

To ensure any customised engine set up, for cylinder base gaskets, we use premium gasket material with low compressibility and controlled tolerance. Several thickness available for 2 Stroke engines.
